and Back Up
for Journals

# Why Does Every Journal Require the Website?

➡ **Website** is the integral attribute of a modern scholarly journal

➡ **Website** is the «show window» of a Journal, the reflection of its' treatment of authors, researchers, partners and databases

➡ **Website** is vital for international databases

➡ **Website** is the profitable advertising place

⇒ International requirements to content display
(such as SCOPUS, Web of Science, PubMed, DOAJ, Google Scholar, etc.)

⇒ Good for databases editors
(everything in its' places)

⇒ Good for researchers
(navigation and search)

⇒ Good for authors
(easy to cite)

⇒ Good for own editors
(subscription, statistics, DOI formation and registration, online manuscript processing)

- Each article shall have its' own URL
- Each article page contains all necessary metadata — abstract, information about authors, references, full text (OA or non-OA)
- Each page with metadata is open and does not need authorization or payment
- Web-site is built good for indexation by search machines (such as Google Scholar)
- Archive is located at the separate special page
- Content of each issue is located at the separate special page and organized according t Best Publishing Practices
- Web-site consists all formal statements such as Publication Ethics, Access to Content, Authors' rights etc.

JOURNAL CASE

**Except obligatory requirements there are special individual requirements of each database, which JournalCase monitors**

- 🙁 There are a lot of different requirements
- 🙁 They are similar but the difference in details
- 🙁 To build a correct website it is necessary to study, understand and apply them

## JournalCase can it all!
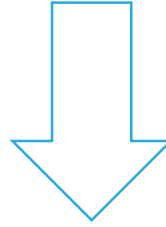

- Administrative staff, experts, bibliographers, supervisors, designers, IT staff

- They all work every day to make your journal fit Best Editorial Practices

- **24/7** work of JournalCase Team on development, support and progress of the web version of the journal.

- Monitoring on all technical details.

- Evaluation of a journal and recommendations on any issue connected with web-versions, databases, indexation, maintaining of Best Editorial Practices

- To make up journal website according to modern standards and rules by structuring of the content and integration of necessary sections

- To drive journal to the international level by inclusion in international index abstract and databases

- To release editors from all technical difficulties connected with the website and content processing — that all would be done by JournalCase staff.
